HAILAGEDDON 2020

Dealerships saw over **\$1 million** of damage from hail. Hailios supported insurance claims being processed within 24 hours thanks to the data captured by Eyewitness.

TESTIMONIAL

“

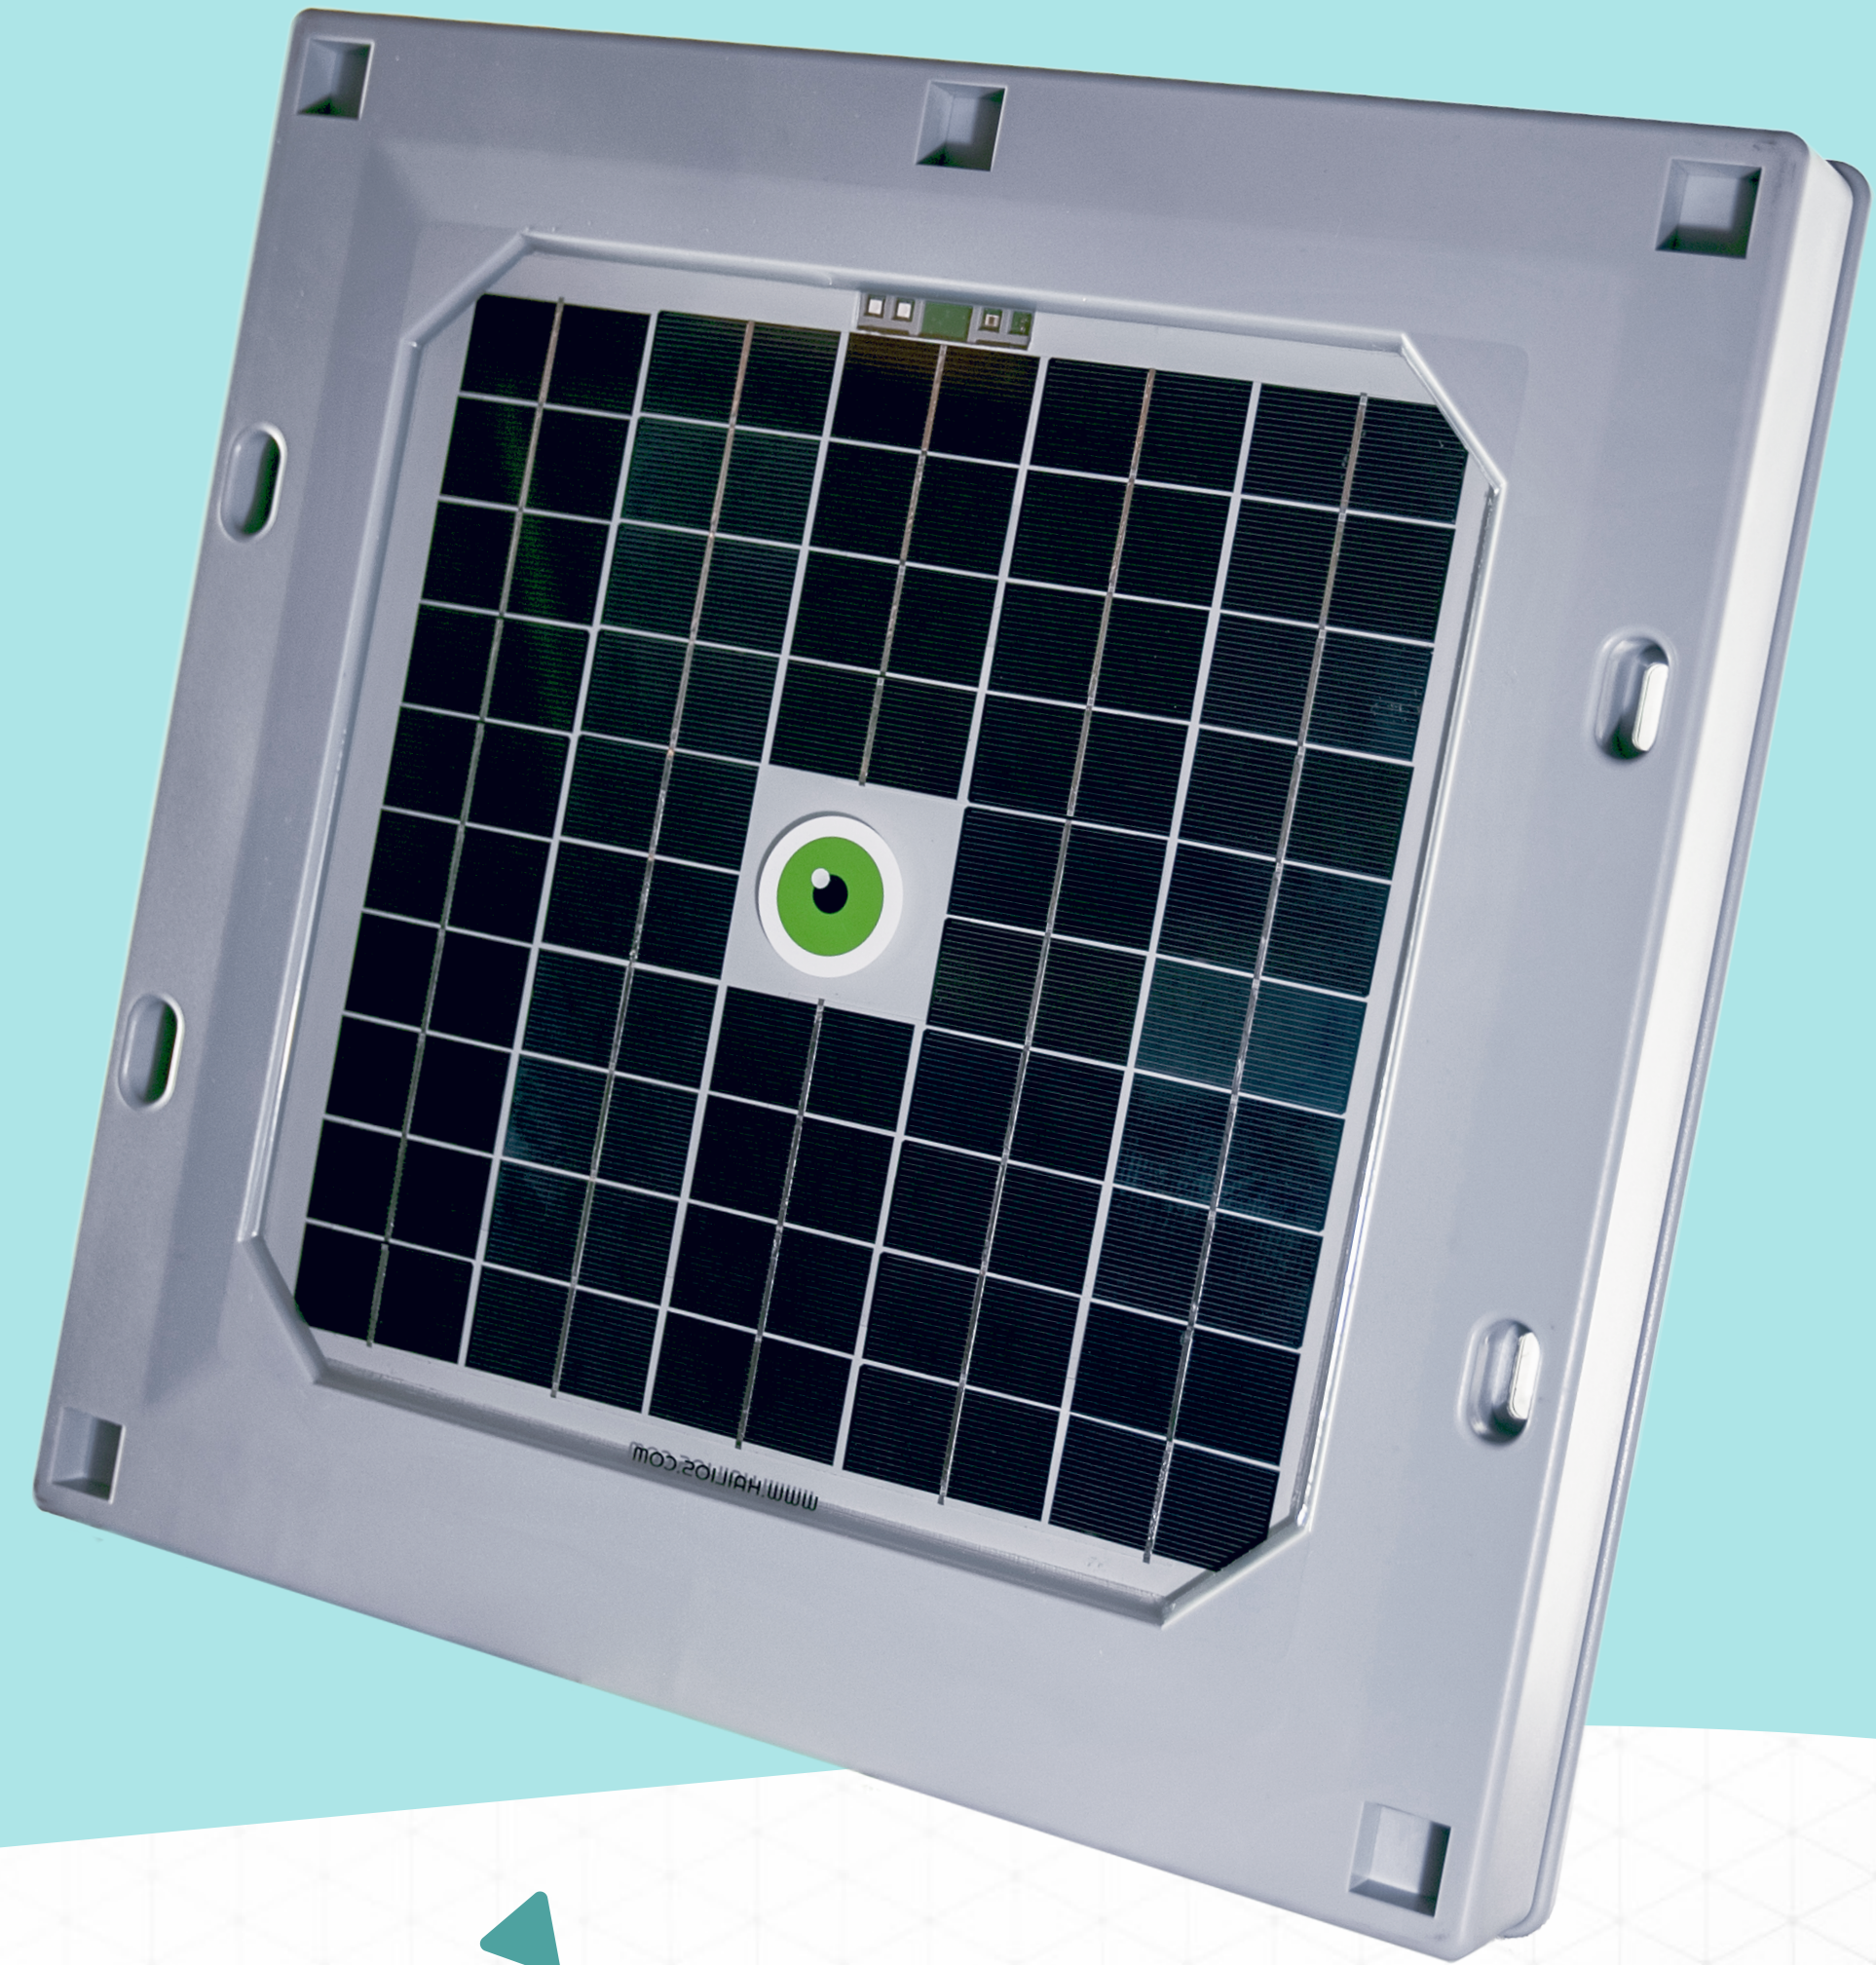

Hailios is critical to the HailSure parametric insurance program. Over the past summer, Hailios's sensors provided data on three auto dealerships involved in a significant hailstorm. The granularity of the data allowed the dealers to collect a 25% greater payout than using radar alone. We are confident that no other data partner can provide the detail needed to trigger parametric hail claims.

Richard Duer, CEO, Hailsure
